

2021 Thales Data Threat Report

Data Security in the Era of Accelerated Cloud Transformation and Remote Work

01

COVID-19 brings new challenges for security

COVID-19

Impact of COVID-19 across organizations and remote working are paving way for the increased security challenges as well as areas of strategic security spend.

22%

of respondents said they were very prepared to handle security risks caused by the pandemic.

81%

are concerned about the security risks/threats of employees working remotely.

46%

ranked privacy and security as the most important investment during the pandemic.

02

Multicloud momentum creates opportunities, but increases risks

43%

PaaS

are using two PaaS providers.

28%

SaaS

are using more than 50 SaaS apps.

48%

IaaS

are using two IaaS providers.

54%

say that more than 40% of their data is stored in external cloud.

50%

say that more than 40% of the sensitive data stored in cloud is sensitive.

17%

state that more than 50% of the sensitive data stored in cloud is encrypted.

25%

have complete knowledge of where their data is stored.

03

Data breaches and security threats increase in complexity

58%

claimed to have experienced a security breach.

49%

report seeing an increase in cyber-attacks in the past 12 months.

54%

ranked Malware as the leading source of security attacks.

47%

saw an increase in Ransomware attacks

04

Zero Trust strategy gaining momentum

31%

have a formal strategy and have actively embraced a Zero Trust policy.

76%

rely on some concepts of Zero Trust security to shape cloud security strategy.

05

Threats on the horizon: quantum computing

44%

are very concerned about the security threats of quantum computing

This level of awareness should be generating interest in post-quantum cryptographic techniques and efforts to improve crypto agility.

06

Modern data security for a Zero Trust world

Discover Sensitive Data

Encrypt Sensitive Data

Secure Encryption Keys

Control User Access
