FIDO Biometric Smart Card: Improve MFA Adoption and Convenience

1 Phishing Protection

FIDO2 protects against Phishing and Man-In-The-Middle Attacks.

2 Greater Convenience

End users authenticate faster and easier by tapping the card on the device and putting their fingerprint on the card.

3 Increased User Adoption

Reach MFA deployment goals by reducing friction for end users.

4 Enhanced data privacy

The biometrics of the user never leaves the smart card.

5 Easy to deploy on Mobile or Laptops

Contact and contactless (NFC) modes permit usage on multiple types of devices.
