

# CLOUD CONNECT ENCRYPTOR

High performance encryption enabling secure movement of data to, from and within the cloud.

High performance

FIPS certified

End-to-end

Trusted

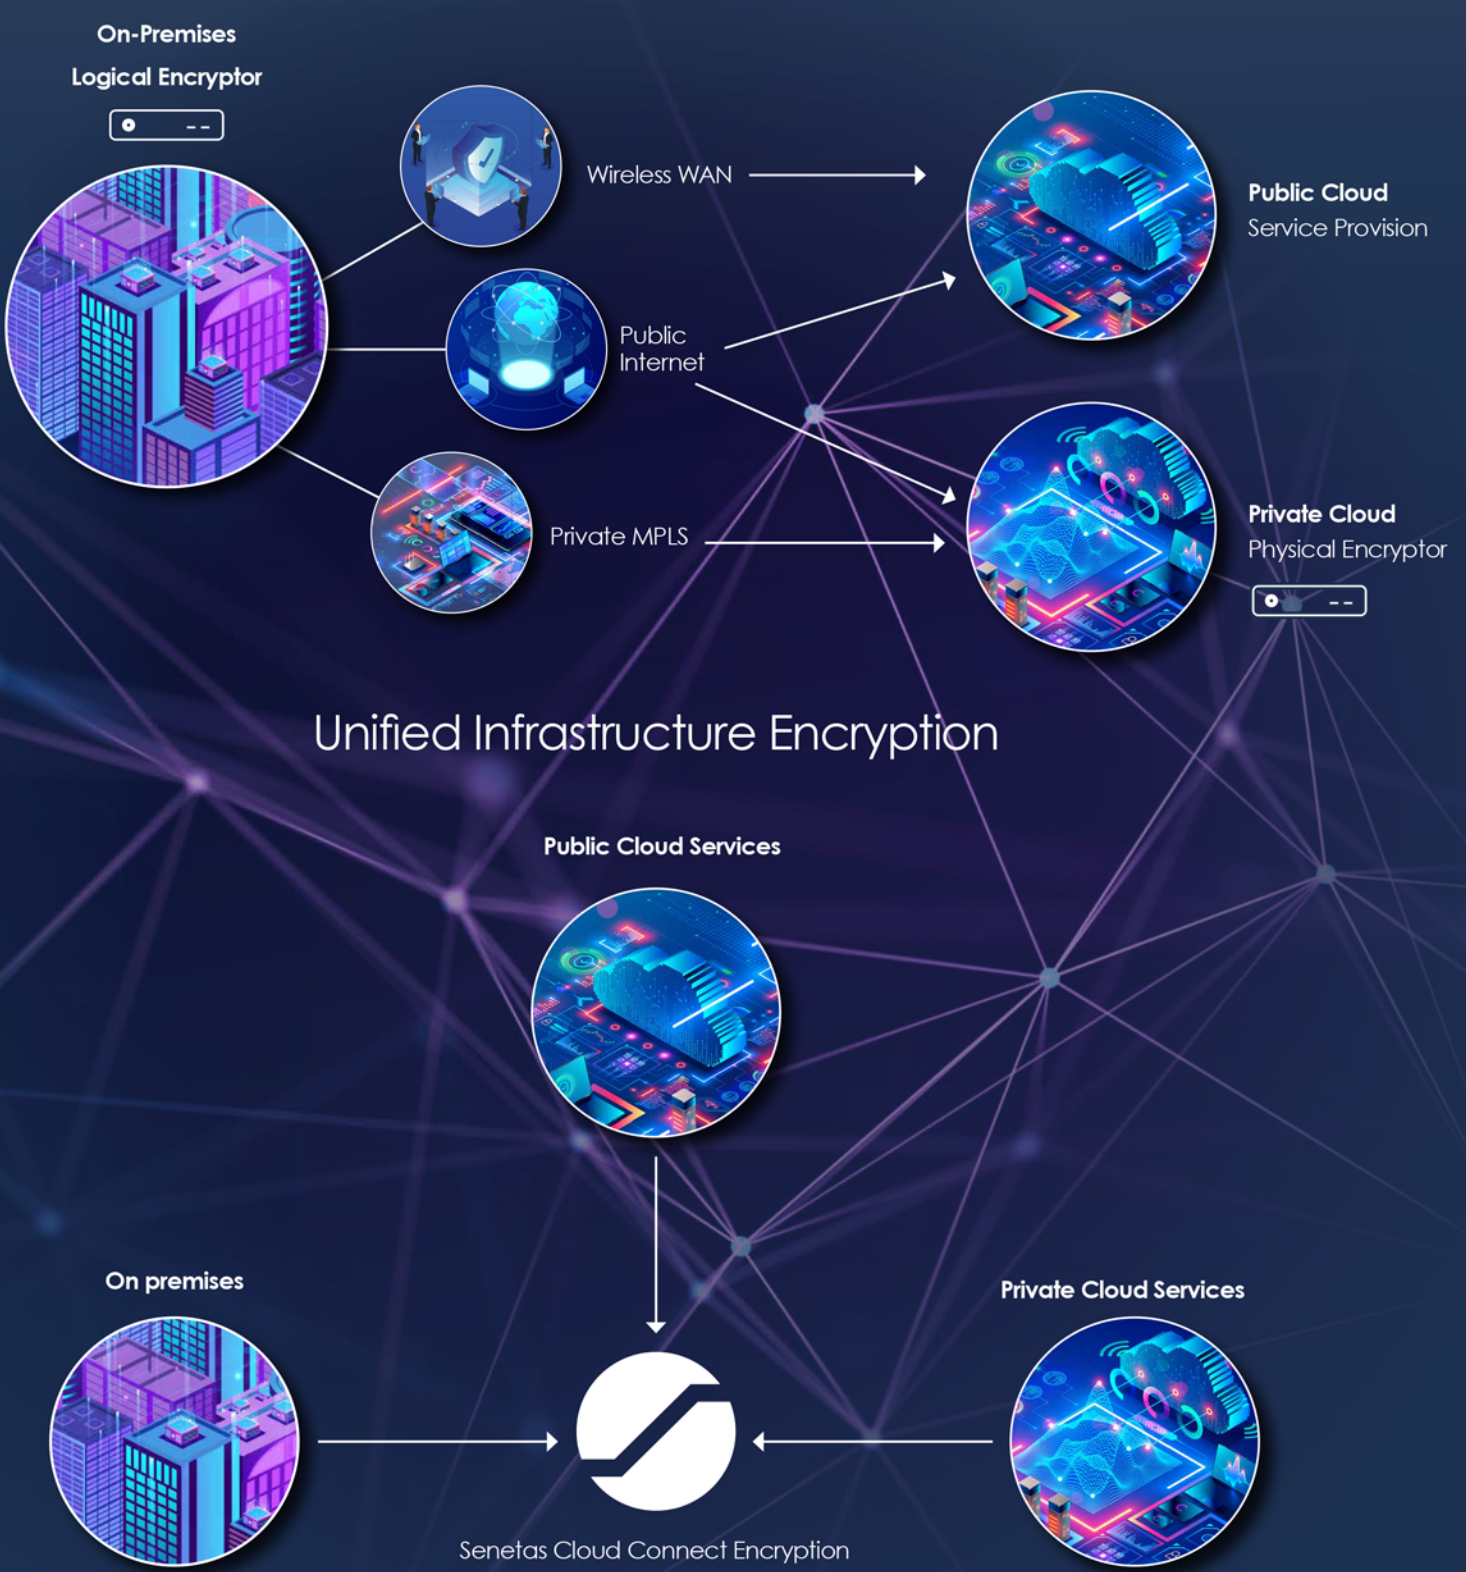

Dedicated, mixed network encryption

security without compromising performance

Network independent encryption

security for all network types and topologies

The **Cloud Connect Encryption platform** comprises dedicated **physical** and **logical** encryption. It enables **multiple network layer** security to, from, within and among **multiple** cloud computing and storage resources, **wherever they are located**.

## KEY FEATURES

Implemented as a cloud native virtual machine 

Supports Microsoft Azure and Amazon Web Services 

Effortless deployment, scalability and management 

Ensures authenticity, integrity and privacy of data
