SafeNet eToken Fusion Bio

Access your most sensitive data securely, with just one touch

Boost Passwordless Adoption

Deliver a fast, intuitive biometric login that drives FIDO adoption across organization.

Eliminates Phishing Attacks

Phishing-resistant device built on the FIDO protocol to protect against today's most common credential based threats.

Respect Data Privacy

With fingerprint on-device authentication, user's biometric data never leave the device.

Fast Deployment - Enterprise Ready

Open standards. No infrastructure required, allowing for quick rollout and simplified management at scale.
