Credential Management
End-to-End Orchestration

THALES
Building a future we can all trust

Versasec credential management, on-prem and in the cloud, offers an out-of-the-box, no-code credential orchestration platform, integrating all systems involved in the credential lifecycle. With Versasec, businesses and organizations can free up resources and time, previously allocated to manual tasks and various software. In addition, end-to-end credential orchestration guarantees results and workflows are consistent, efficient, secure, and compliant with company guidelines.

Passwordless Identities &Modern Authentication

Versasec products integrate with phishing- credentials, compliant with government regulations. Whether PKI, FIDO or both fit your eco system, Versasec empowers to easily adopt multi-factors for modern authentication.
Tokens	Mobiles	Smart Cards	Virtual Smart Cards

Establish Zero Trust

Zero Trust focuses on granular-level security protection. Hardware PKI and security standards like FIPS, NIST, CAC, and PIV, establish continuous verification and can adhere to the least privilege principle around the most targeted - users and devices. By facilitating the deployment of phishing resistant credentials, FIDO and/or PKI, Versasec helps organizations establish zero trust. As a result, providing the most efficient way to protect your company.

| Logical Access	Website Authentication	Remote Access	Data Encryption	Digital Signature	Physical Access	Visual Identification	Lifecycle Management

Intuitive	Flexible	Easy Migration	Cost Effective
Fast	Secure	Customizable	Scalable
