

# How to set up your FIDO Biometric Smart Card

Follow these simple steps to **Add Your PIN, Enrol Your Fingerprint, Register** and then **Authenticate** your SafeNet IDPrime FIDO Bio smart card. You will need a Windows desktop and a card reader.

## Add your PIN

- 1 On your Windows computer, select **Start > Settings > Accounts**.

- 2 Select **Sign-in options**.
- 3 Select **Security Key**.
- 4 Select **Manage**.
- 5 Tap your **Smart Card** on the reader, or insert it.

- 6 Select **Add**, located under the **Security Key PIN** option.

- 7 Enter a **Security Key PIN** and then re-enter it in the fields provided. Then select **OK**. **Congratulations, you have added your PIN.**

## Enrol Your Fingerprint

- 1 On your Windows computer, select **Start > Settings > Accounts**.

- 2 Select **Sign-in options**.
- 3 Select **Security Key**.
- 4 Select **Manage**.
- 5 Tap your **Smart Card** on the reader, or insert it.
- 6 Under the **Security Key Fingerprint** option, select **Add another**.

- 7 Enter your **Security Key PIN** in the field provided and then select **OK**.
- 8 Enrol your fingerprint by placing your finger on the sensor and removing it when the scheme on the screen changes.

- 9 Repeat touching the sensor with your finger as many times as required.
- 10 When enrolment is complete, select **Done**.
- 11 Select **Close. Congratulations. Your fingerprint is now enrolled on your card.**

## Register Your Smart Card

IMPORTANT NOTE: This site is used as an example, only. You must also register your card on protected websites that you want to access.

Follow these steps to register your FIDO card on the Thales demo site: <https://fido.demo.gemalto.com/>

- 1 Enter **your name** in the field provided and then select **Register**.
- 2 Select **External security key** or **built-in sensor**.
- 3 Select **OK**.
- 4 Select **OK**.
- 5 Place the same finger you enrolled above on the sensor. Then tap your **Smart Card** on the reader, or insert it.
- 6 After your fingerprint is verified, the LED will display an **orange light**.
- 7 The welcome screen will be displayed, and your card is now registered and accessible.

## Authenticate Your Smart Card

To authenticate with SafeNet ID Prime FIDO Bio smart card on the Thales demo site go to <https://fido.demo.gemalto.com/>.

- 1 Enter the name that you used during Registration and then select Login.
- 2 Tap your **Smart Card** on the reader, or insert it.
- 3 **Congratulations. You now have access to the site.**
